### ABOUT NELSON RESOURCES

Nelson Resources key focus is the Woodline Project.

Woodline lies on the boundary of the Albany Fraser Oregon and the Norseman - Wiluna Greenstone belt in Western Australia and could host a Tropicana Style deposit. Woodline has a 20km gold geochemical and bedrock anomaly that lies in the Northern Foreland of the Albany Fraser Oregon which also hosts the 7.8Moz ounce Tropicana Gold Mine.

Tropicana Gold Mine which is operated by AngloGold Ashanti was discovered in 2005 by IGO Group Limited via a gold-in-soil anomaly that led to further exploration and is one of the most important gold discoveries in Australia for decades. Tropicana currently produces approximately 450,000 ounces per annum. In today's gold price terms, that equates to over A\$1 billion dollars per annum.
